

# Mobile Applications with PIM

Make your business stand out in the marketplace by allowing customers to access your products from their smart phones. Questudio's mobile development team has solutions that will help you add another direct-marketing channel in less time. Quickly launch a Mobile Application for your business along with integration of Questudio's products and your ERP.

We have APIs that can connect to your ERP enabling you to deliver rich content to your mobile applications in real time. Easily Manage Orders, Prices, Inventory, and Shipping of products that are ordered online.

## Benefits

- APIs Available for Popular ERPs.
- Integrate your mobile application with CatalogStudio (PIM Software)
- Deliver up-to-date information directly to your customers' mobile devices
- Deploy your Mobile Application with PhoneGap and AEM frameworks
- Increase your sales as customers will have access to your products on the go
- Keep your customers continuously engaged with your business
